HVAC TECHNOLOGY SIMPLIFIED: PERFECT FOR SALES AND SUPPORT STAFF

Taught by Joey Henderson, Second Expert to be Announced

Joey Henderson

An overview of HVAC technology without all the complications. Understand the general terms, relate to the end user, and be confident with your communications. After this course, you will have a visual image in your head of all these HVAC technology terms. Support Staff: Learn what technicians mean and learn how to relate to a customer's pain.

Sales Staff: Learn how to relate HVAC technology to the customer's needs.

NOVEMBER 4 – 11, 2023

ADVANCED HVAC ELECTRICAL

(Instructors to be announced)

This will cover an in-depth instruction on electrical components, their operations, and troubleshooting procedures. This will build upon a technician's electrical understanding and take them to a deeper level of troubleshooting methodology.

NOVEMBER 11 – 18, 2023

STARTING YOUR IN-HOUSE TRAINING PROGRAM FOR CONTRACTORS

Taught by Eugene Silberstein and Ryan Burns

Eugene Silberstein

Ryan Burns

As an industry renowned author, presenter, and curriculum designer, Eugene Silberstein will be leading this course on starting your in-house training program. Tudi Mechanical Systems is named one of the best contractors on the U.S. East Coast by Air Conditioning, Heating and Refrigeration News. Tudi prides itself on being innovative and strategic within the industry and as a result, Tudi University was created to elevate technicians. Ryan Burns is the architect of Tudi University program and he will be sharing his experiences in the educational career program. Attendees leave this course with a customized strategic guide for their company's resources.
